Experience

ImmersaCAD, Inc. – Technical Developer - Internship
Knoxville, TN July 2016 – September 2016

- Refined and created Webpages for registered clients to access and use
 - Implemented Laravel Blade templating system into client webpages; allowing 100% of standard code to be re-used without re-writing
 - Implemented Vue.js to allow for dynamic pages while providing static info through Laravel's Blade system
- Researched various optimizations for use within the ImmersaCAD app
 - Samsung / Oculus GearVR submission requirements
 - Solved issues with Rhino models during the immersification process
 - Worked with 3DsMax to diagnose model issues and implement solutions
 - Utilized Unity3D to work with the App resolving items to meet requirements
 - Used: ADB, Android Studio, Oculus Remote Monitor, and Unity Profiler

Albright and Company, LLC – Billing and Receivables
Knoxville, TN July 2012 – October 2013

- Processed billing bi-weekly and receivables daily
- Helped the business owner to go paperless
 - Developed and implemented going paperless on the billing process; improving the process 100%
 - Created custom time and billing reports
 - Increased accessibility and efficiency of needed management billing information by 200%
 - Improved the billing efficiency by 50%
- Trained non-IT staff one-on-one on various software such as Adobe Reader and Creative Solutions Practice CS
- Computer Maintenance

University of Tennessee Memorial Hospital – Surgery lounge secretary
Knoxville, TN August 2001 – July 2005

- Helped patients' families by informing and updating them on the surgery's progress
- Received internal phone calls from doctors and nurses with information to relay to patients' families
- Made calls to the surgery nurse's station to obtain info for patients' families
- Received external phone calls and obeyed the HIPAA laws by only relaying generic information
